OneClick digital Android app now available!

OneClickDigital offers two file types, "Not Protected" and "Protected"

Not protected – Might be called "MP3" files in your device's owner's manual.

Protected – Might be called "WMA DRM" or "secured WMA" files in your manual.

What type of file do you need? Here are some common audio players:
Creative, Sandisk, and Sony devices will play "Protected" and "Not Protected" files.
iPhone/iPod, Android, Kindle, and Nook devices will play "Not Protected" files only.

Still not sure?
Check the owner's manual for your device to find out what type of audio file it will play.

Limit by File Type
You will see these limiting options once you do a search or choose a subject to browse

New folder

2. Find and open the downloaded zip folder and open the new folder you just created, select all the files in the zipped folder and drag to the new folder and the items will unzip.
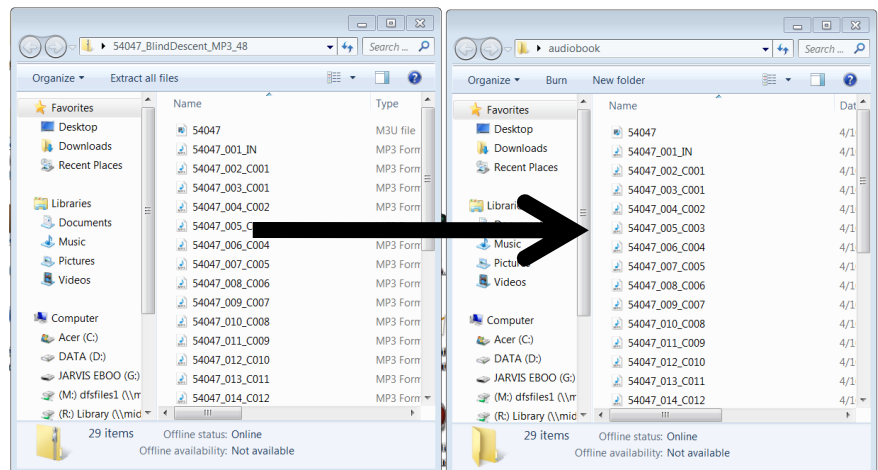

Transfer the Audiobook to your iPhone, iPod, and iPad

Connect your device to your computer using the USB cable.

Open iTunes, click on the name of your device, click "On this …", then "Add to.." then open the folder that contains the new unzipped audiobook on top of iTunes. Select all the sections of the unzipped title and drag onto the right sidebar.
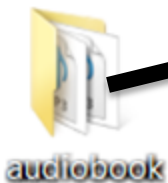

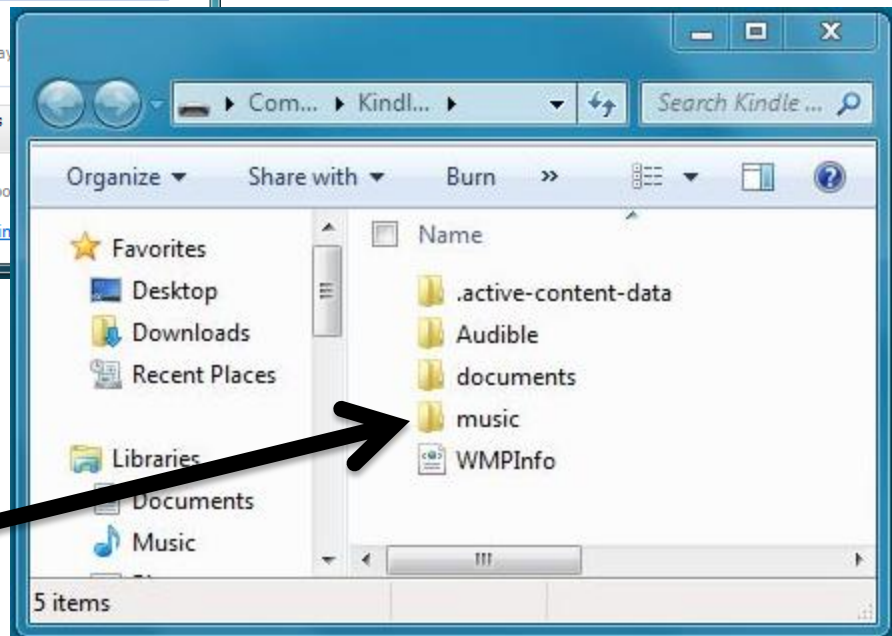

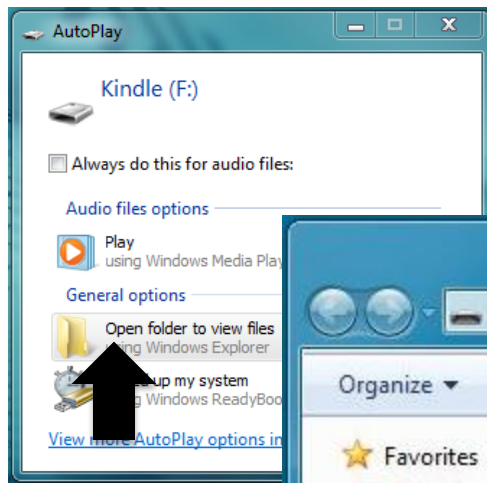

1. Click the name of your device

2. Click "On this …"

3. Click "Add to.."
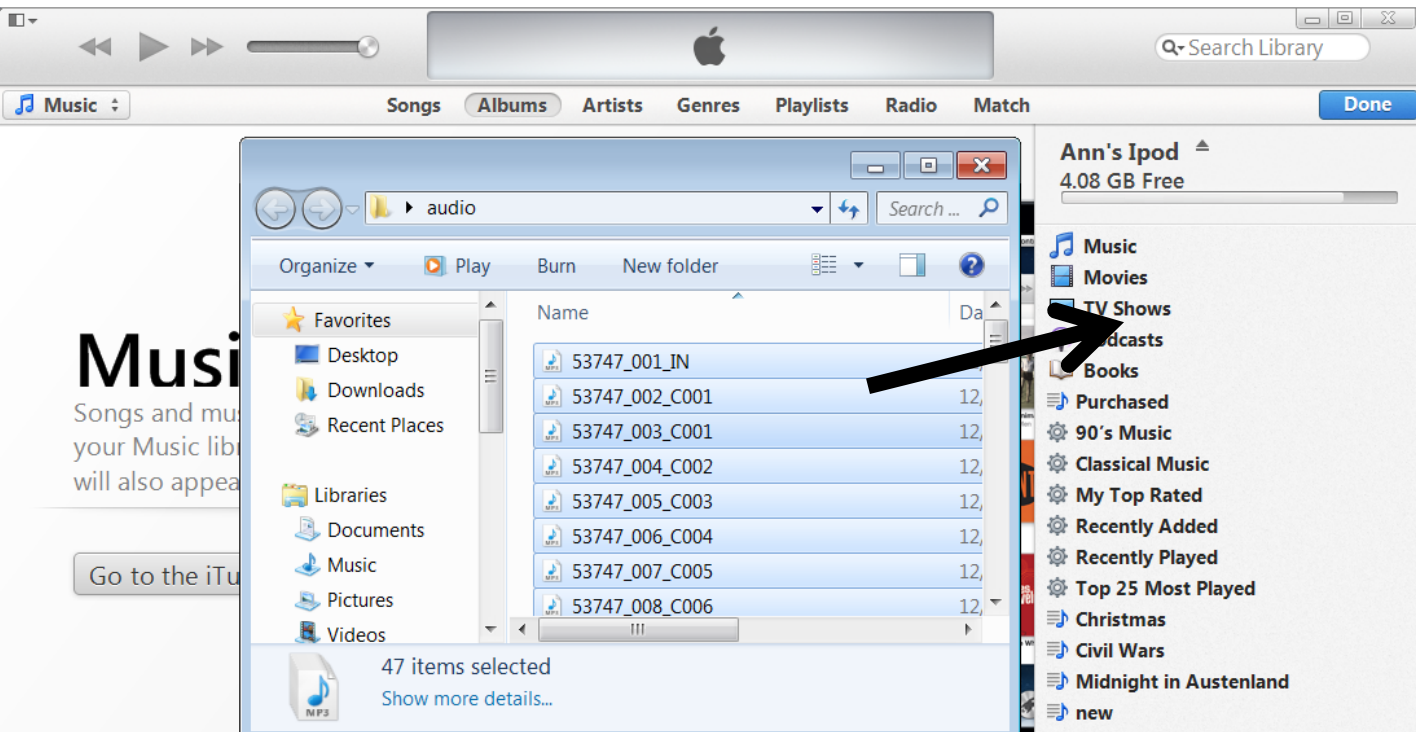

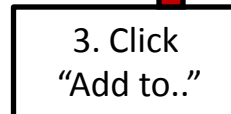

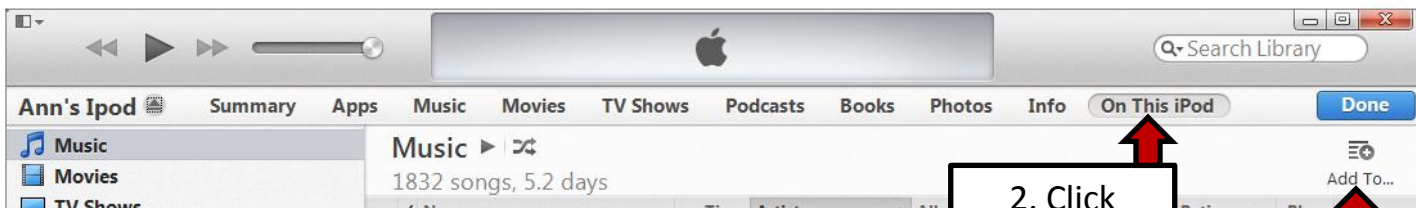

Transfer the Audiobook to your Kindle or Nook

Connect your device to your computer using the USB cable.

Open the device's folder and drag and drop the unzipped audiobook sections onto the music section of your device.
(Not all eReaders will play music files)

Transfer the Audiobook to most other players

For Protected titles (WMA)
Download the license before transferring to your device.
Click any track in the unzipped folder to start playing. When the track begins to play you will see a screen that will require you to login with your OneClickDigital username and password, then click "Play."
Then you can transfer.
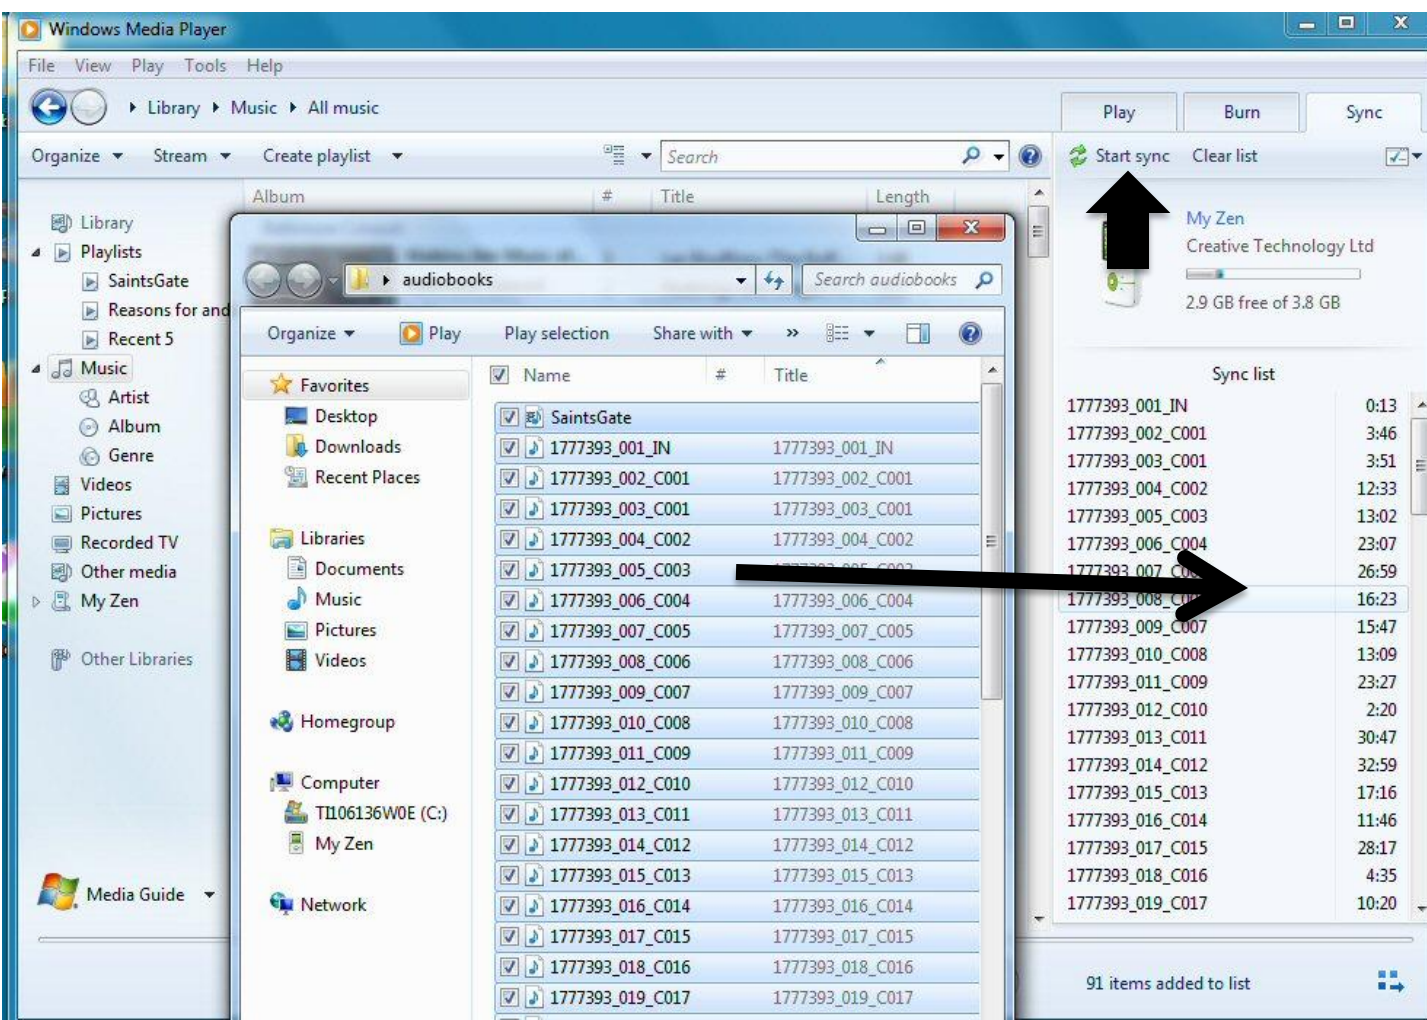

Connect your device to your computer using the USB cable.

Open Windows Media Player, then open the folder that contains the unzipped audiobook folder on top. Select all the sections of the title and drag to the right sidebar. Click "Start Sync" to load the sections onto your device.
